Excellent education for your child

Values, goals and principles

Welcome to the German Embassy School Addis Abeba

On behalf of our teachers and staff, I would like to welcome you to the German Embassy School.

We seek to foster each student's growth by combining proven teaching techniques with new, innovative ideas.

We provide individualized support to our students from kindergarten through grade 12. We prepare our students to take on challenges to develop stamina and resilience.

For us, learning is balanced with a school culture that values respect, tolerance, solidarity and responsibility for the environment and society. We are proud to teach in small groups.

At our School, we maintain a lively community. Parents, students, and staff work together.

Please contact us with any questions you may have.

Sincerely,

Dr Martin Nutz, Head of School

Kindergarten — Perfect Preparation

Around 100 children attend the kindergarten in mixed age groups. Due to the welcome diversity of nationalities, we attach great importance to learning the German language. Our educational work is guided by a holistic and project-based approach to promoting early childhood development. We do this by actively incorporating the different cultures of the children into our learning activities.

Primary School — Ideal learning setting

Our primary school offers German-speaking children from different countries an ideal learning environment. Many attended our kindergarten, which provides the successful participation in German-language classes. Our curriculum and after-school care DBSAA aspires to develop the emotional, intellectual and physical potential of each student in a family friendly, safe, and stimulating environment.

Secondary I — Promoting talent

Grade 5 gives orientation. New subjects and methods are introduced. The goal of Secondary I is to deepen each child's capacity to learn in order to prepare each student for his or her professional or academic future.

Secondary II — The way to IB

Since 2003, German Embassy School has successfully offered the *Gemischsprachiges International Baccalaureate* (GIB). We are one of 5.400 IB schools worldwide in 154 countries. The IB Diploma, which is a challenging two-year, pre-university program equivalent to the German Abitur, is widely recognized by the world's leading universities. Our graduates have a multifaceted education with deep knowledge of math, languages, research arts, and culture. Additionally, our IB graduates develop the intelligence to communicate with and understand people from different countries and cultures.
